

Ceramide Lotion

Specification Sheet

Description: Ceramide Emulsion for skin care.

CAS: 7732-18-5, 100403-19-8, 178436-06-1, 57-88-5, 73398-61-5, 92128-87-5, 554-62-1, 57-11-4, 112-80-1

INCI Name: Water (and) Ceramide NP (and) Cholesterol (and) Caprylic/Capric Triglyceride (and) Hydrogenated Lecithin (and) Phytosphingosine (and) Stearic Acid (and) Oleic Acid

Composition: Water (and) Ceramide NP (and) Cholesterol (and) Caprylic/Capric Triglyceride (and) Hydrogenated Lecithin (and) Phytosphingosine (and) Stearic Acid (and) Oleic Acid (and) Caprylyl Glycol (and) Caprylhydroxamic Acid (and) Glycerin (and) Lactic Acid

Appearance: White to off-white viscous liquid

Benefits:

- Concentrated lotion that can be added to skin care products for easy incorporation.
- Contains Ceramide NP that helps to improve the appearance of aged skin as it deeply moisturizes.
- Helps restore the protective barrier function of the skin.

Use: Add 0.5 - 5% to emulsion-based systems.

Applications: Lotion, creams, functional makeup, suncare products, after-sun care, face masks and overnight treatment.

Solubility: Disperses in emulsion-based systems, Water dispersible

Preservation: Caprylyl Glycol, Caprylhydroxamic Acid, Lactic Acid

Storage: Store at a cool and dry place, avoid exposure to sunlight.

Country of Origin: South Korea

Raw material source: Palm/ Palm Kernel, Coconut, Sunflower, Soy bean, non-genetically modified microorganisms

Manufacture: The process involves two distinct phases: A water phase and an oil phase. These phases are prepared separately, then combined and emulsified. The resulting mixture is subsequently allowed to cool.
