### Procedure

Weight ingredients and combine in a heat resistant glass beaker.

Melt at 75C, blend.

When fully melted pour into mold.

### Properties

Waterless conditioning bar with nourishing oils and butters. Keep in trend with formulations that use less or no water. Conditioning bar can be used on wet hands and then added to damp hair, or bar can also used to comb through damp hair. Let sit, the longer, the better the conditioning, then rinse out.
