4 FIRST AID MEASURES

Eyes:	Remove contact lenses. After contact with the eyes, rinse with water with the eyelids open for a sufficient length of time, then consult an ophthalmologist immediately.
Inhalation:	In case of inhalation, affected person should be moved into fresh air and kept still. If breathing is difficult consult a doctor.
Skin:	Remove contaminated, saturated clothing immediately. Wash thoroughly the body (shower or bath). When in doubt or if symptoms are observed, get medical advice.
Ingestion:	Do Not Induce Vomiting! Never give anything by mouth to an unconscious person. Seek medical attention if necessary. If accidentally swallowed rinse the mouth with plenty of water and obtain immediate medical attention.

5 FIRE-FIGHTING MEASURES

Suitable (and unsuitable)	May be combustible at high temperature. Use appropriate media (carbon dioxide, foam,
----------------------------------	--

extinguishing media:	powder, water mist) for adjacent fire. Do not use direct water jet. Use water jets only to cool the surfaces of the containers exposed to fire.
Special protective equipment & precautions for firefighters:	Wear self-contained, approved breathing apparatus and full protective clothing, including eye protection and boots. Cool containers with water to avoid possible decomposition of the product and formation of potential hazardous substances. When possible, collect extinguishing water and avoid contamination of surface waters or drains.
Flash Points:	>482°F (>250°C)
Specific hazards arising from the chemical:	Avoid breathing combustion products. See also Stability and Reactivity section.

6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment & emergency procedures:	Do not try to clean up the leak without proper protective equipment. See section 8 for recommendations on the use of personal protective equipment.
Environmental precautions:	Avoid liquid release into sewers/public water. Notify environmental authorities in case of large leaks.
Methods and material for containment and cleaning up:	Collect product with mechanical devices (if product is flammable use only antistatic equipped spark-free tools) and store in suitable containers for disposal. Use inert absorbent material (sand, vermiculite, diatomaceous earth, etc.) to soak up leaked product. Collect the majority of the remaining material and store in suitable containers for disposal. Make sure the leakage site is well aired. Contaminated material should be disposed in compliance with the provisions of Section 13. Dispose of all waste and cleanup materials in accordance with regulations.

7 HANDLING & STORAGE

Precautions for safe handling:	Avoid product dispersion. When using do not eat, drink, smoke, sniff. Avoid improper contact with skin and eyes and inhalation. If product is flammable provide adequate earthing of containers, equipment, pumps and ventilation facilities. Avoid product dispersion, keep containers well closed. See section 8 for recommendations on the use of personal protective equipment. Keep container closed when not in use.
Conditions for safe storage, incl. any incompatibilities:	Store in a fresh place, not under direct sunlight and, if product is flammable, keep away from fire and sources of ignition. Store in original containers; after use replace the closing cap. If product is moved to other containers, label them the same way as the original packages. Do not store in open or unlabeled containers. Keep away from heat and incompatible materials (see section 10 for incompatibilities).
