

Iron Oxide Black, Liquid

Specification Sheet

Description: Cosmetic-grade inorganic pigments (iron oxide black) dispersed in octyldodecanol. 34-45% pigment content. Very fine dispersion (free of aggregates > 5 microns).

CAS: 1317-61-9, 5333-42-6

INCI Name: CI 77499 (iron oxides), octyldodecanol

Composition: CI 77499 (iron oxides), octyldodecanol, alumina, magnesium oxide

Appearance: Viscous black liquid

Benefits:

- High-quality extra fine color dispersion providing superior color purity and saturation
- Can be easily incorporated into various color cosmetics

Use: Typical use level 0.1-40%. Can be tinted with other oil-dispersed colors or oil-dispersed titanium dioxide to create lighter shades. For external use only.

Applications: Decorative cosmetics as mascara, foundations, lipsticks, nail lacquers, eye liners, lip liners, lip gloss, blush, soaps, bath salts.

Solubility: Water-insoluble, oil-dispersible

Preservation: Preservative-free

Storage: Store light-protected at a cool and dry place

Country of Origin: USA

Raw material source: Iron salts

Manufacture: Thermal decomposition of iron salts, precipitation of iron salts, and reduction of organic compounds by iron. Final pigment is then dispersed in octyldodecanol.

Animal Testing: Not animal tested

GMO: GMO-free (does not contain plant-derived components)

Vegan: Does not contain animal-derived components

HS Code: 3206490000

Regulatory Information: Iron Oxide Black is a FDA-approved color additive but is exempt from batch certification. It is safe for use in coloring cosmetics generally, including cosmetics applied to the area of the eye, in amounts consistent with good manufacturing practice.
