#### Method

Mix phase A into a glass beaker and heat to 150oF/66oC. Add phase B to phase A and stir. Remove from the heat. Add phase C into another glass beaker and heat to 165F/74 until the ascorbyl palmitate is melted. Remove from the heat. Add phase D to phase C and stir well. Add phase C/D to phase A/B and stir well to form the Cream-Gel. After the temperature has cooled to 100F/40C add phase E and stir again well. The viscosity can further be adjusted with GelMaker EMU.

#### Properties

Light textured Cream-Gel with UVA and UVB protection plus anti-oxidants such as vitamin c and vitamin E. Matrixyl S-6 and Teprenone have potent anti-aging properties.
