

DeoConcentrate Prebiotic

Specification Sheet

Description: 100% natural prebiotic blend is designed to shift the odor profile to a more neutral and natural scent.

CAS: 9012-72-0, 98-79-3, 66-84-2, 107-43-7, 56-85-9, 657-27-2

INCI Name: Yeast Beta-Glucan, PCA, Glucosamine HCl, Betaine, Glutamine, Lysine HCl

Composition: Yeast Beta-Glucan, PCA, Glucosamine HCl, Betaine, Glutamine, Lysine HCl

Appearance: Off white to light tan powder, bland odor

Benefits:

- Offers strong deodorant efficacy promoting a more neutral and natural underarm scent.
- Water soluble and oil dispersible - suitable for use in wide range of deodorant formulations.
- Provides gentle 'microbiome balancing' to support hydration, moisturization and skin barrier improvement in the underarm area.

Use: Add to the water phase of the formulation. Water phase can be heated up to 80C. Recommended to be used at 4% as a standalone active and at around 3% in combination with other actives. For external use only.

Applications: Deodorants creams, stick and roll-ons.

Solubility: Soluble in water

Storage: Store in a cool and dry place

Country of Origin: USA

Raw material source: Yeast, Beetroot, Glucose and Corn.

Manufacture: Saccharomyces cerevisiae undergoes enzymolysis which is further processed and mixed with Glutamin Acid, Glucosamine, Betaine, Glutamine and Lysine HCl which undergoes milling blending and sieving and it is packaged further.

Animal Testing: Not animal tested
