

## Spring Colored Eye Shadow

(Sample Recipe for Mica Magenta)

### Spring Colored Eye-Shadow

| Phase A              | Weight % | For 20 g /0.7 oz |
|----------------------|----------|------------------|
| Mineral Base         | 81 %     | 16.2 g / 0.6 oz  |
| Magnesium Stearate   | 5 %      | 1 g / 1/2 tsp    |
| <b>Phase B</b>       |          |                  |
| Ultramarine Pink     | 4 %      | 0.8 g / 1/4 tsp  |
| <b>Phase C</b>       |          |                  |
| Mica Gold            | 2.5 %    | 0.5 g / 1/4 tsp  |
| Mica Magenta         | 2.5 %    | 0.5 g / 1/4 tsp  |
| Mica Light Blue      | 2.5 %    | 0.5 g / 1/4 tsp  |
| Mica Diamond Cluster | 2.5 %    | 0.5 g / 1/4 tsp  |

#### Method

Give Phase A into a clean mortar and blend well with the pestle.

Add phase B to Phase A and blend well with the pestle or divide Phase A to make multiple colors.

When Phase C is added the pestle should not be used anymore.

Alternative colors are for example: ultramarine blue instead of the ultramarine pink or a combination of the two to create purple. The proportions of the colors can be changed, by adding more to create more intense shades or less for lighter pastel shades.

#### Properties

Loose eye shadow to be used with small shaker/sifter jars.
