

## Rose Hydrosol

### Specification Sheet

**Description:** Pure distillate (hydrosol) from rose flowers. Hydrosols are aromatic water produced during the steam distilling process of plants and flowers. They have similar scents and functional properties as essential oils but are less concentrated. Clear to pale golden in color, medium intensity lavender scent. Water soluble.

**CAS:** 7732-18-5, 8007-01-0

**INCI Name:** *Rosa damascena* (Rose) distillate

**Benefits:**

- Has skin-softening, humectant, rejuvenating, and anti-aging properties
- Can be used directly on the skin without further dilution
- Can be used in place of water in creating natural fragrances, lotions, creams, facial toners and other skin care products

**Use:** Add to water phase of formulas, typical use level 1 - 100%. For external use only.

**Applications:** Serums, creams & lotions, toners, skin cleansers, sun- and after-sun care, sunscreens.

**Country of Origin:** Australia

**Raw material source:** Rose (*Rosa damascena*) flowers

**Manufacture:** Prepared through steam distilling of plants & flowers.

**Animal Testing:** Not animal tested

**GMO:** GMO-free

**Vegan:** Yes
