Method

Mix the water, sodium glutamate and glycerin. Then sprinkle the thickeners into the solution, blend with a stick blender, then let hydrate until thick. Heat phase A to 170F/76C. In another vessel combine phase B ingredients and heat to the same temperature. Add phase B to phase A and blend well, using stick blender or homogenizer, remove from the heat source and cool to 100F/40C. Add phase C, one by one, stirring well after each ingredient or using the stick blender for a short time.

Properties

Mineral rich lotion with hydrating aloe vera, algae extract & hyaluronic acid, for a perfect Beauty sleep replenishing the skin with up to 60 trace minerals. The creamy consistency from shea butter, squalane & coconut oil will moisturize and soften, leaving a hydrated and replenished skin in the morning.
