# FIRE-FIGHTING MEASURES

Suitable (and unsuitable) extinguishing media:

Special protective equipment & precautions for firefighters:

Flash Points:

Specific hazards arising from the

chemical:

May be combustible at high temperature. Use appropriate media (water, carbon dioxide,

foam, halogen) for adjacent fire. Do not use direct water jet.

Wear self-contained, approved breathing apparatus and full protective clothing, including eye

protection and boots.

dust. See also Stability and Reactivity section.

# **6 ACCIDENTAL RELEASE MEASURES**

Personal precautions, protective equipment & emergency procedures:

**Environmental precautions:** 

Methods and material for containment and cleaning up: Do not create dust. Do not try to clean up the leak without proper protective equipment. See section 8 for recommendations on the use of personal protective equipment.

Avoid liquid release into sewers/public water. Notify environmental authorities in case of

large leaks.

Collect as much as possible for use or disposal in a properly labeled container. Flush

remainder into normal drainage with copious amounts of water.

# **HANDLING & STORAGE**

Precautions for safe

handling: Conditions for safe storage, incl. any incompatibilities:

Ensure there is sufficient ventilation in the area. Avoid generating dust. See section 8 for recommendations

on the use of personal protective equipment. Keep container closed when not in use.

Suitable packaging: paper, plastic or poly lines bags or drums. Store in cool, dry well-ventilated area. Keep away from heat and incompatible materials (see section 10 for incompatibilities).
