

## Signature Matte Liquid Lipstick Base No. 2

### Specification Sheet

**Contents:** Isododecane, disteardimonium hectorite, trimethylsiloxisilicate, magnesium stearate, silica, dimethicone, jojoba oil, propylene carbonate, polysilicone-11, tocopherol.

**Appearance:** Tan paste, faint odor.

**Properties:** This base is a bit more moisturizing than the LMLB No1, but still dries to a matte finish. It's a soft paste that has a satiny feel when applied then dries matte, it's pretty smudge proof. It doesn't have titanium dioxide to give a more vibrant, true-to-color finish. Customize by adding colorants D&C reds in liquid form and micas. 100% vegan.

**Use:** Stir well before use. Mix with our liquid red colorants, add colored mica for variation, blend well & transfer to vials using a syringe. Depending on pigment type add up to 15% of colors. For external use only.

**Storage:** Refrigerated or room temperature, keep from freezing, protect from light & humidity. **Yield:** 3.5oz/100g of the base gives about 17-22 lipstick vials.

**Applications:** Liquid Lipsticks.
