

Green Tea Butter

Specification Sheet

Description: Hydrogenated vegetable oils blended with finely ground matcha green tea leaves resulting in a buttery soft consistency.

CAS: 8007-69-0, 90320-37-9, 68334-28-1, 84650-60-2

INCI Name: Prunus amygdalus dulcis (Sweet Almond) oil, hydrogenated vegetable oil, camellia sinensis leaf powder

Composition: Prunus amygdalus dulcis (Sweet Almond) oil, hydrogenated vegetable oil, camellia sinensis leaf powder

Appearance: Soft, creamy butter, faint odor.

Benefits:

- Rich in polyphenols, epigallocatechin gallate (EGCg) & xanthines (caffeine and theobromine)
- Antioxidant properties due to EGCg (in-vitro studies showed that it is as potent as vitamin E tocopherol)
- Natural anti-irritant and moisturizing agent often used as add-on ingredient in anti-wrinkle and anti-aging applications.

Use: Add to oil phase of formulations. Melts above 100° F/40° C. Typical use level 3-100%. Can be used pure for skin treatments. External use only.

Applications: Lotions, creams, butters, sun care & after sun products (1-10%), hair care (1-5%), ointments and balms 4-100%.

Solubility: Soluble in oils, insoluble in water

Preservation: Preservative-free

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Green tea leaves and hydrogenated almond oil and other vegetable oils.
