

SkinWhite BLE

Specification Sheet

Description: Skin lightening agent made from natural arbutin extracted from bearberry leaves (arctostaphylos uva-ursi) and vitamin C (magnesium ascorbyl phosphate).

CAS: 497-76-7, 114040-31-2, 113170-55-1

INCI Name: Arbutin, magnesium ascorbyl phosphate

Composition: Arbutin, magnesium ascorbyl phosphate, glycerin, water, sodium benzoate, sodium metabisulfate, phenoxyethanol

Appearance: Clear yellowish liquid

Benefits:

- Contains a natural form of hydroquinone that has skin-lightening and antioxidant activities
- In-vitro studies showed that SkinWhite BLE is able to inhibit production of melanin pigments in skin cells
- Improves the appearance of age spots and dark skin areas
- Very popular in Asian countries to lighten hyperpigmented skin areas

Use: Recommended use level 4-8%, only 1% when combined with exfoliants, add to the water phase (not over 60°C/140°F) or to finished products, stable in the pH-range of 4.0 to 7.0. For external use only.

Applications: All kinds of skin-lightening products including lotions, creams, fluids, makeup products.

Solubility: Water-soluble

Preservation: Sodium benzoate, sodium metabisulfite, phenoxyethanol

Storage: Store in a closed container at a dry place at room temperature

Country of Origin: Switzerland

Raw material source: Bearberry leaves

Manufacture: Beta-arbutin extracted from bearberry leaves is formulated with a stabilized vitamin C form (magnesium ascorbyl phosphate), glycerin, sodium benzoate, sodium metabisulfate, phenoxyethanol, and water.

Animal Testing: Not animal tested
