

Methyl Gluceth-10

Specification Sheet

Description: Natural glucose derivative made as polyethylene glycol ether of methyl glucose. Pale yellowish viscous liquid. Water-soluble.

CAS: 68239-42-9

INCI Name: Methyl gluceth-10

Benefits:

- Very effective water-retention properties that help prevent water-loss from the skin
- Enhances spreadability of products
- Can significantly reduce skin irritation associated with any anionic and amphoteric surfactants
- Excellent emollient properties providing a smooth and gentle skin feel
- Has also thickening and emulsifying properties

Use: Can be added to formulas as is. Add to oil phase, use level 2-15%. Storage: Stable when kept in a closed container at a cool & dry place. For external use only.

Applications: Lotions, creams, after-shave products, bar soaps, bath products, shampoos and cleansing products.

Country of Origin: USA

Raw material source: Corn sugar and corn starch

Manufacture: Methyl gluceth-10 is produced from glucose and methyl alcohol.

Animal Testing: Not animal tested

GMO: Not tested for GMOs

Vegan: Does not contain animal-derived components
