

Neroli Hydrosol

Specification Sheet

Description: Distillate (hydrosol) from neroli flowers. Hydrosols are aromatic water produced during the steam distilling process of plants & flowers. They have similar scents and functional properties as essential oils but are less concentrated.

CAS: 72968-50-4

INCI Name: Citrus Aurantium Amara (Neroli) Flower Water

Composition: Citrus Aurantium Amara (Neroli) Flower Water, Propanediol, Ethylhexylglycerin, Potassium Sorbate

Appearance: Colorless to pale golden, clear to slightly cloudy mobile liquid, characteristic neroli odor

Benefits:

- Has antimicrobial, soothing, moisturizing and antioxidant properties.
- Can be used directly on the skin without further dilution.
- Can be used in place of water in creating natural fragrances, lotions, creams, facial toners and other skin care products.

Use: Add to water phase of formulas, typical use level 1 - 100%. For external use only.

Applications: Serums, creams & lotions, toners, skin cleansers, sun- and after-sun care, sunscreens.

Solubility: Water-soluble

Preservation: Propanediol, Ethylhexylglycerin, Potassium Sorbate

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: Paraguay

Raw material source: Citrus Aurantium (Neroli) flowers

Manufacture: Prepared through steam distilling of plants & flowers.

Animal Testing: Not animal tested.
