

Glycolic Acid

Specification Sheet

Description: Glycolic acid is a naturally occurring alpha hydroxy acid (or AHA). Synonym: hydroacetic acid. Clear, slightly yellowish liquid. Characteristic odor. Concentration: 70% (30% water). Grade: CG. pH Value 0.5-2.0. Easily soluble in water.

CAS: 79-14-1

INCI Name: Glycolic acid

Benefits:

- Can reduce the appearance of fine lines, irregular pigmentation, age spots & decreases enlarged pores
- Very useful in exfoliating products as alpha-hydroxy acid peel, or in creams & lotions at a lower concentration for a more gentle acid-based peel
- Widely used to rejuvenate the skin by encouraging the shedding of old surface skin cells

Use: Typical use level is between 1-20% (final concentration of glycolic acid). For making a 10% AHA peel, use about 14.5% of glycolic acid 70, making a 5% AHA peel, use about 7.2%. For home use, it is not recommended to make AHA peels higher than 20% (equals about 28.5% of glycolic acid). **Important:** Do not use glycolic acid pure and undiluted; the solution is highly acidic and can lead to skin irritation and skin burns. Storage: stable ~1 year, store cool & light protected. External use only. Please note that when using this ingredient regularly in skin care products, the skin will be very sensitive and needs to be protected from the sun, wearing sunscreen or any other protection.

Applications: Peels, creams, lotions, masks, cleansers. Due to its acidity the final product needs to be tested for safe pH. Optimal pH range from 3.5-5.0. Some over the counter products, after adding glycolic acid, will separate as a result of the low pH, and need to be stabilized.

Country of Origin: USA

Raw material source: Monochloroacetic acid

Manufacture: Glycolic acid is produced by hydrolysis of molten monochloroacetic acid with 50% aqueous sodium hydroxide at 90-130°C. The resulting glycolic acid solution is about 60-70% concentrated.

Animal Testing: Not animal tested

GMO: GMO free (does not contain plant-derived components)

Vegan: Does not contain animal-derived components
