

## Jojoba Pearls, White

### Specification Sheet

**Description:** Jojoba pearls are tiny, spherically shaped beads consisting of hydrogenated natural jojoba oil (= jojoba wax), round shape warrants effective but gentle exfoliation, not animal tested. Small, round beads, faint odor. Insoluble in water. Ultrafine pearl size (40/60 mesh size or 250-425 microns) is ideal for exfoliation on delicate skin such as the face, lip and cuticle exfoliation.

**CAS:** 61789-91-1

**INCI Name:** Hydrogenated jojoba oil

**Composition:** Hydrogenated jojoba oil

**Purity Grade:** No purity grade applicable

**Appearance:** Small, round white beads, faint odor

**Benefits:**

- Highly effective exfoliation without the abrasiveness like other natural or synthetic exfoliants
- Provides elegant emolliency
- Non-occlusive and non-comedogenic
- Very mild and suitable for sensitive skin

**Use:** Can be added to formulas as is, typical final concentration 1-15%. Add to formulation at the end when the temperature is below 100°F/40°C. Melting point of jojoba pearls is 65-72°C/150-160°F. For external use only.

**Applications:** Shampoos, specialty bar soap, lotions, creams, body washes, body scrubs, shower gels.

**Solubility:** Water-insoluble

**Preservation:** Preservative-free

**Storage:** Store in a closed container at a dry place at room temperature

**Country of Origin:** USA

**Raw material source:** Jojoba oil
