## Rice Bran Beads

### Specification Sheet

**Description:** Natural exfoliating scrub made of finely granulated rice bran wax. The granules are round-shaped, non-scratchy balls of about 500µm diameter. Beads are pale colored, filtered, bleached, and sprayed.

**CAS:** 8016-60-2

**INCI Name:** *Oryza sativa cera* (Rice) bran wax

**Benefits:**

- Excellent natural non-scratchy and gentle exfoliant
- Due to its perfect ball-shaped form it is ideal also for sensitive skin
- Can replace polyethylene beads in products and is much gentler than walnut shells
- Easy to incorporate into creams, cleansing lotions, and gels

**Use:** Add 3-50% to scrub formulations, face cleansers, shower gels. For external use only.

**Applications:** Exfoliating creams, foaming scrubs, skin peels.

**Country of Origin:** USA

**Raw material source:** Rice bran wax

**Manufacture:** Rice bran wax is made by extracting the wax from the bran oil of rice (*Oryza sativa*). It is then further processed to form tiny pellets.

**Animal Testing:** Not animal tested

**GMO:** No data available

**Vegan:** Does not contain animal-derived components
