**Method**

1. Dissolve sodium gluconate in water in a heat-resistant beaker. 2. Add remaining phase A ingredients, stirring well and neutralizing the pH to 5.5 - 6 with triethanolamine. 3. Combine phase B ingredients in a separate heat-resistant beaker. 4. Heat both beakers to 70 C, and add phase B to phase A with consistent stirring. 5. Remove from heat, and continue to mix until cooled to 40 - 45 C. 6. Add phase C ingredients in order, stirring after each addition. Color is optional.

**Properties**

Provide your skin with all the benefits of vegetables overnight! Carrot cells help bring all of the nutrients of the plant along with pea extract which helps smooth skin texture for flawless looking skin. Apply a layer at night as the last step in your skin care or apply generously all over the face and neck as a cream mask after cleansing.
