

Lip Crème

(Sample Formulation for SeaFerment SA)

Lip Crème for Lip Lines		
Phase A	Weight %	For 100g/3.6oz
Distilled Water (diluent)	81 %	81 g / 2.9 oz
ICE Silicone (emollient/emulsifier)	8 %	8 g / 0.3 oz
Phase B		
Argan Oil (emollient)	6 %	6 g / 0.2 oz
SeaFerment SA (anti-wrinkle agent)	4 %	4 g / 0.15 oz
Phase C		
Phenoxyethanol/SA (preservative)	1 %	1 g / 22 drops
Method		
This is a simple formulation that does not need heating. All you need is a good mixer like a stick blender or similar.		
Add phase A into a disinfected mixing vessel. Mix thoroughly. The powder will mix with the water and upon mixing well it will form a thick cream instantly.		
Add phase B to phase A and mix again thoroughly so that there are no granules/lumps visible.		
Add phase C to phase A/B and stir again well.		
The consistency can be adjusted by adding more ICE Silicone or if too thick can be diluted with distilled water.		
Apply to lips 2x/daily for best results.		
Properties		
SeaFerment SA targets the lip lines, studies have shown good results within 1-4 weeks treatment when applied at least 2x/daily.
